Performance
Indicators**

Data is just the beginning of a process of data-driven decision making

Becoming a data -driven organization rests on building infrastructure around **data**, **analysis**, and **use**.

**Prosecutorial
Performance
Indicators**

Criminal justice data comes with challenges

- Agency diversity
- Data system diversity
- Data encoding diversity
- Insufficient data definition and poor documentation
- Proprietary system inconsistencies
- *Case management systems are not built for data analyses*

Data availability and data quality are issues,
but lack of **analytic capacity** prevents data
use in many offices.

Indicators

Analytic capacity comes with challenges

Data-driven decision making will not sustain itself. There must be a **plan for how data will be used.**

Criminal Justice**

**Prosecutorial
Performance
Indicators**

Data use comes with challenges

- Often occurs only within executive team
- Often lacks clear connection to office goals
- Rarely integrated into work routines
- Often presented in tables/inaccessible formats
- Often seen as “oversight” rather than decision-making tool
- *Prosecutors don't like or don't trust statistics*

Becoming a data -driven organization rests on building infrastructure
