EMERGENT

About Emergent

At Emergent, our mission is simple – **to protect and enhance life.**

For **25 years**, we've been at work helping protect people from things we hope will never happen—so we are prepared, just in case they ever do.

We provide **solutions** for complex and urgent **public health threats** through a **portfolio of vaccines, therapeutics and treatments** that we develop, manufacture and distribute to governments and consumers worldwide.

We also offer a range of **targeted contract development and manufacturing services** for pharmaceutical and biotechnology customers.

We do what we do because we see the opportunity to create a better, more secure world. One where preparedness empowers protection from the threats we face. And peace of mind prevails.
