Obesity/overweight is one of the top consumer household self-reported health conditions

Percent of household in NIQ Consumer Panel reporting ailments in 2024

Source: NIQ Annual Shopper Health Study, 2024, Q. Below is a list of health-related conditions / ailments. Please read the list carefully and then select the condition(s) that anyone in your household, including yourself, has experienced during the past 6 months. Please select all that apply

Households with self-reported obesity/overweight is surprisingly declining but those households also have higher likelihood to report other ailments

Percent of NIQ Panel self-reporting Overweight/Obese member(s) in their household

Households reporting obesity/overweight are **2-3 times more likely** to also report the following health conditions:

- Pre-diabetes
- Urinary incontinence/overactive bladder
- Type II Diabetes
- Menopause/perimenopause
- Restless leg syndrome
- Irritable bowel syndrome
- Gum disease
- Hair loss

61% were diagnosed by a health professional

66% having been diagnosed more than 5 years ago

Treatment and management has shifted over time

How did members treat or manage their obesity/overweight ailment?

Percent of households self-reporting how they treat/manage obesity/overweight ailment

Source: NIQ Health Shopper Survey, 2016 to 2024; Q. What influenced the decision for you/your household member to treat or manage the [ailment] in the ways mentioned? Select all that apply.

Diet, nutrition and supplementation is shifting

▶ Households with reported obesity/overweight **index high among heavy ‘ultra-processed’ buyers** *and* also among heavy fresh produce buyers

▶ **Food and Beverage products** with claims around ‘weight management’ or ‘obesity support’ are limited and are seeing declines in units (-1%) and items selling (-9%) over the last four years

▶ **Weight management supplements** are down -10% in sales over the last four years, however, **berberine**, which went viral on many social media platforms, **is up 438% in the last year¹**

Note: Berberine is coded across multiple supplement categories (diabetes, general health, etc). The calculation is to show size relation only.
