

Perspective from the National Program of Cancer Registries

Vicki Benard, PhD

Chief, Cancer Surveillance Branch

Division of Cancer Prevention and Control

July 29, 2024

Enabling 21st Century Applications for Cancer Surveillance
through Enhanced Registries and Beyond

The Question That Forever Changed Cancer Registration

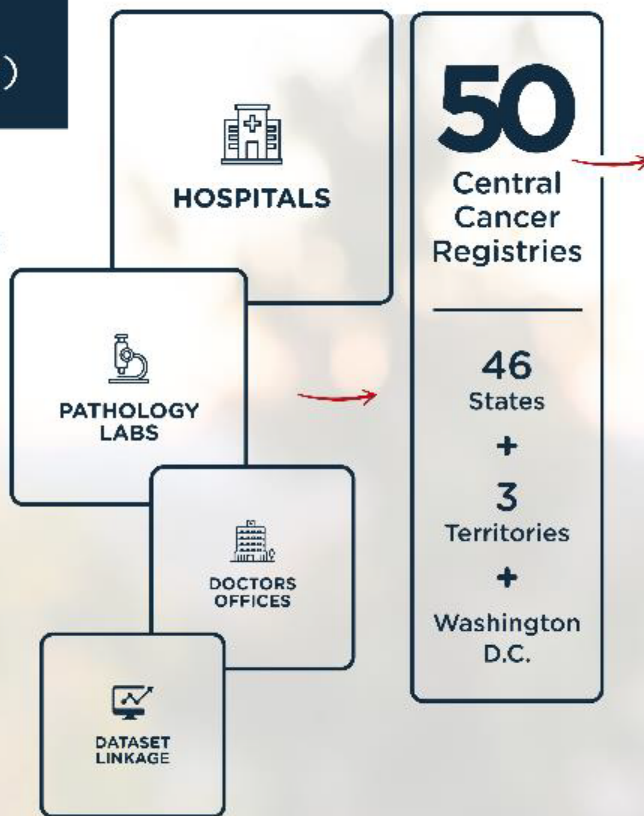

**Why are so many Vermont
women dying of
breast cancer?**

National Program of Cancer Registries (NPCR)

- Coordinates collection, verification and reporting of important information on all reportable cancer cases.
- Helps identify better ways to prevent, treat and control cancer.

- Data Visualization Tool
- State Cancer Plans
- Public Use Dataset
- Reports & Research

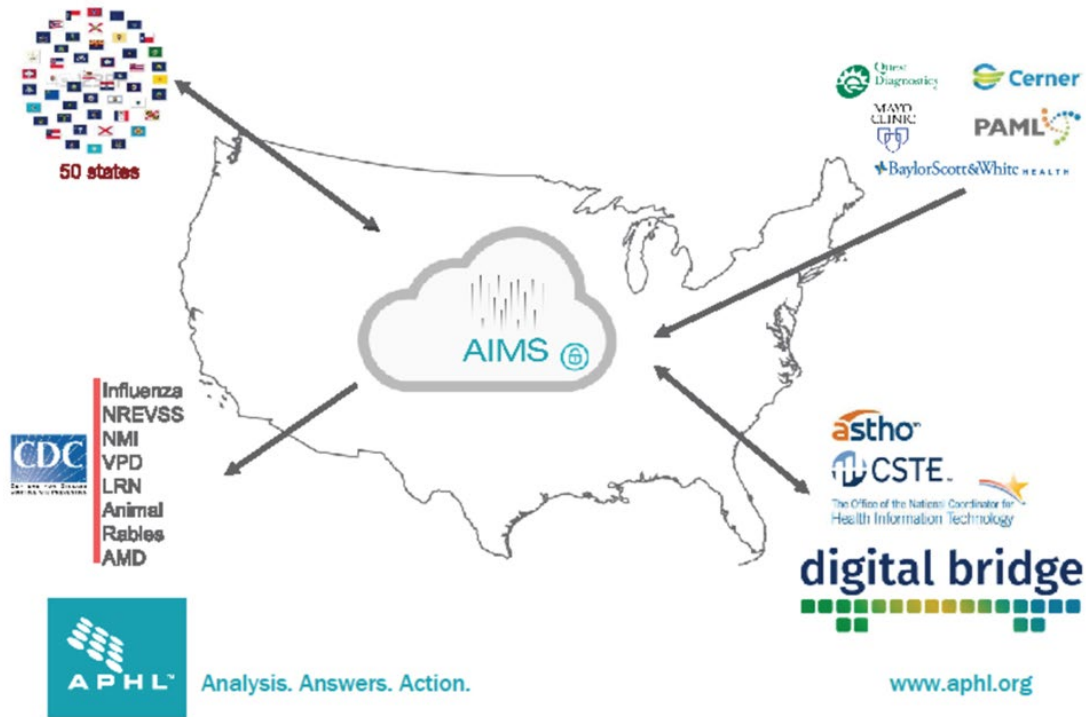

Over 1.7 million new cases & nearly 600,000 deaths annually.

U.S. Department of
Health and Human Services
Centers for Disease
Control and Prevention

Measuring Progress. Targeting Action.

A National Resource for Interoperability

Leveraging Electronic Health Records (EHRs)

- Utilizing EHR data for multiple public health domains and varied use cases
- Producing FHIR Implementation Guide and reference architecture for cancer case reporting

ATSDR

Cancer Surveillance Vision

- Streamlined reporting to single platform
- Reproducible, interoperable, and scalable
- Resource and cost effective
- Timely data exchange between data reporters and registries

Thank You!
