

transforming global CO₂ emissions

into existing materials

our business model is CO₂ conversion as a service

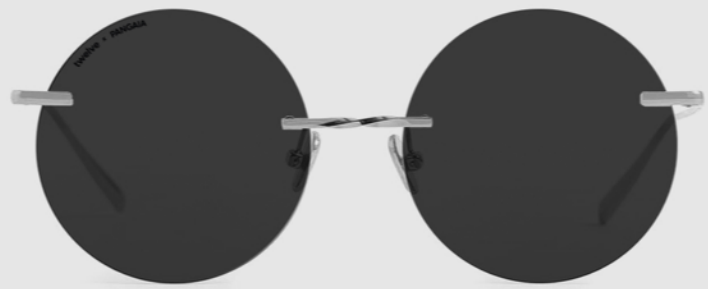

Modular: Twelve systems produce a portion of CO demand. Share can grow over time with more modules.

Drop-in: CO from Twelve is blended with conventional CO, producing identical products.

Traceable: End customers secure offtakes for CO₂-based products. Twelve earns recurring revenue share.

Capital light: Units are funded with project finance.

products that we have shipped

world's first CO2Made sunglasses lenses

PANGAIA^{LAB} × twelve

world's first CO2Made ingredients for Tide

P&G

world's first jet fuel made from CO2
