FINDING CURES TO

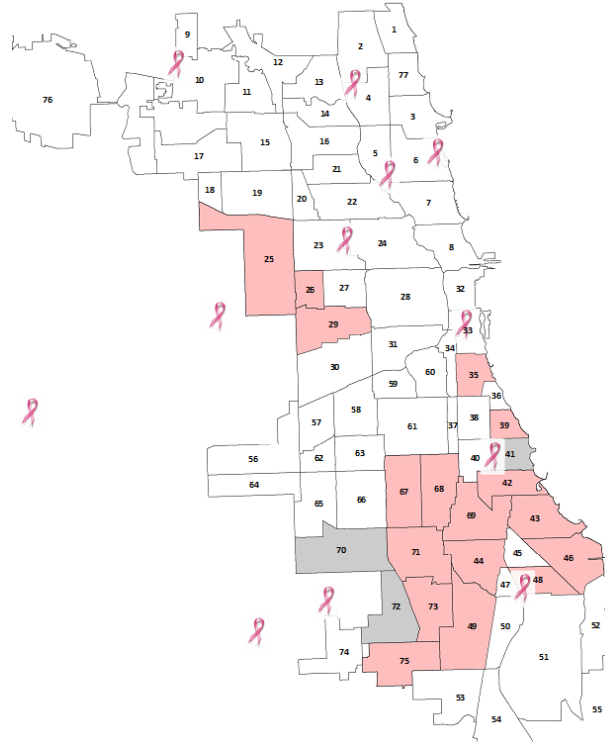

REFRAMING mitigation strategies

Re-framed/Extended Strategies

- Reframe what is DATA → Communityomics
- Acknowledge & Redistribute Power → shift from equity to justice needs power/privilege redistribution via allyship, sponsorship
- Shift focus inward: trust to trustworthiness → instead of measuring/seeking/fixing trust, reflect on our own individual/institutional trustworthiness

Reframe Data

INTEGRATED

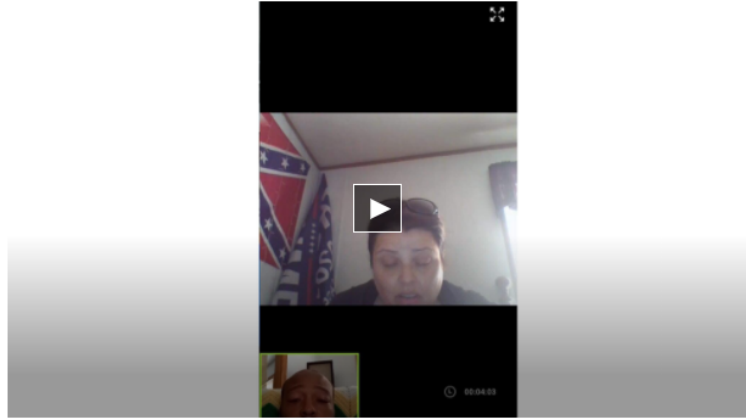

Data to drive ~~equity~~ JUSTICE

Gretna man says PA increased his meds, made him think he was crazy for pointing out flag

by Elizabeth Tyree & Kailey Baylor | Thursday, July 16th 2020

A

Donald Wilson called his doctor Pamela O'Dell through video chat Friday afternoon and when he pointed out a confederate flag in the background, he said that Dr. O'Dell increased his medications (Photo provided by David Wilson)

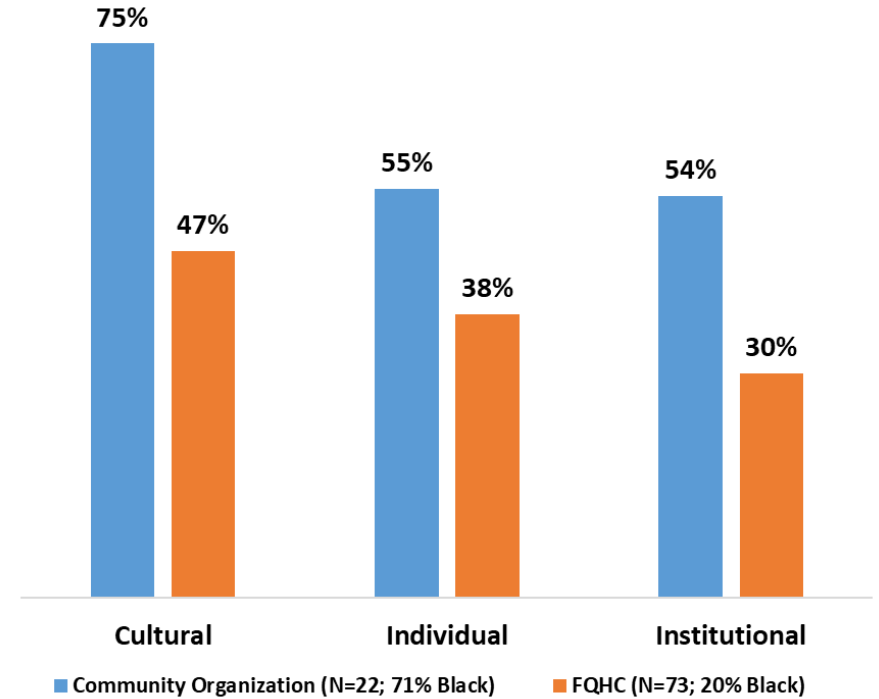

GRETNA, Va. (WSET) -- A Gretna man says his Danville physician assistant increased his medication dosage after he noticed a confederate flag on the PA's wall.

Donald Wilson is diagnosed with anxiety and PTSD, causing him to seek psychiatric care.

What he thought would be a regular follow-up appointment, Wilson said turned into a traumatic experience.

Wilson called his healthcare professional, Pamela O'Dell, through video chat Friday afternoon. When he noticed O'Dell, sitting by a confederate flag, he said it caught him off guard.

Differences in Race-Related Stress Experiences between members of community organizations (19% White, 71% Black) and FQHC staff (75% White, 20% Black)

Acknowledge & Redistribute Power

Shift focus inward:
trust → trustworthiness

TRUSTWORTHINESS
Characteristics that support or inspire trust — ability, benevolence & integrity.

TRUST PROPENSITY
One's inherent willingness to rely on others.

TRUST
A willingness to accept vulnerability based on expectations of a positive outcome.
